### Formatting changes

This book was converted from a Google Digital Scan.

**We are not done with this yet, when we are, this line will be removed.**

While we take a lot of effort to insure the accuracy of this "modified" version we don't try to make a perfect copy. Editing every line is time consuming, so the reader may note the following:

- We converting scanned images into text using automated tools
- Imperfections in original images (dots, specks, lines) goof things up.
- OCR tools are not perfect, poorly formed characters are poorly converted
- Lines that are short because of wrapping are "rejoined" and hyphens removed
- Things like <sub>subscript</sub> and <sup>superscript</sup> are often mangled by OCR tools
- Names in the original can be spelled incorrectly
- Names in the original can have alternate, more common, spellings
- Because we have search tools now, the index has been removed.

When we offer alternate spellings they are in brackets: **Smyth [Smith]**

When things get mangled in predictable ways, we use "search and replace" on selected text to "correct them".

If you are a purist, there is good news. We are including word processing version of this document, and you can do as you please with it.

1 1784 is written above as a correction.

2 It is surprising what effort many people will make to be wrong. Gen. Sumter never spelled his name with a p in it and there is no p sound in the pronunciation of the name, yet we frequently find the name spelled with a p in it by a person who necessarily had the General's signature, which was a plain one, before him.
